

CAREER TECHNICAL EDUCATION

At East Mississippi Community College preparing students for work is WHAT WE DO. We recognize that a four-year degree isn't the only pathway to a high-paying career. We offer more than 30 different career-technical programs across a variety of locations. Our programs combine rigorous technical education with hands-on experience and industry-recognized credentials to give students an advantage in the job market. EMCC offers top notch instruction, access to cutting edge technology and equipment, and the personalized support you need to succeed--all at a fraction of the price of a four-year degree.
